CONTENTS OF VOLUME 35

NUMBER 1—JANUARY 2004

A two-unit parallel system supported by $(n-2)$ standbys with general and non-identical lifetimes
E. PAPAGEORGIOU and G. KOKOLAKIS ... 1

A multiple-population evolutionary approach to gate matrix layout
A. MENDES and A. LINHARES ... 13

A new conditioning dual-rate observer-based tracker for hybrid chaotic systems with saturating actuators
J. Y. LIN, J. S. H. TSAI, L. S. SHIEH and S. M. GUO ... 25

Optimal scheduling of two-component products on a single facility
W.-H. YANG ... 49

Estimation of Pareto sets in the mixed $\mathcal{H}_2/\mathcal{H}_\infty$ control problem
R. H. C. TAKAHASHI, R. M. PALHARES, D. A. DUTRA and L. P. S. GONÇALVES ... 55

Optimal lot-sizing problem with imperfect maintenance and imperfect production
S.-H. SHEU and J.-A. CHEN... 69

NUMBER 2—FEBRUARY 2004

Optimal multi-variable control of gas turbine engines
O. D. LYANTSEV, T. V. BREIKIN, G. G. KULIKOV and V. Y. ARKOV ... 79

An optimal solution of a general lot size inventory model with deteriorated and imperfect products, taking into account inflation and time value of money
Z. T. BALKHI ... 87

Nonlinear one-step-ahead predictive mean control of bounded dynamic stochastic systems with guaranteed stability
Y. WANG, H. WANG and J. JIAO ... 97

Analysis of a multirate sampled-data implementation of a continuous-time, sliding-mode observer/controller pair
G. HERRMANN, S. K. SPURGEON and C. EDWARDS ... 109

Tools for establishing dominance with linear partial information and attribute hierarchy
C. H. HAN... 123

Optimal production run length and capital investment in quality improvement with an imperfect production process
K.-L. HOU and L.-C. LIN ... 133

Observer-based sliding mode control for nonlinear state-delayed systems
Y. NIU, J. LAM, X. WANG and D. W. C. HO ... 139

NUMBER 3—MARCH 2004

Nonlinear controller construction based on a model with state-dependent representation for a nonlinear system
M. NAKAMURA and T. ZHANG... 151

Exponential stability assignment of neutral delay-differential systems by a class of linear–quadratic regulators
T. KUBO ... 159

Evolving a multiobjective obstacle avoidance skill of a seven-link manipulator subject to constraints
T. NANAYAKKARA, K. WATANABE, K. KIGUCHI and K. IZUMI ... 167

Comparison of group replacement policies under minimal repair
K. S. PARK and Y. K. YOO... 179

Parameter estimation of stochastic linear systems with noisy input
W. X. ZHENG... 185

A fast regularization parameter selection for regularly sampled 2D inputs
K. INOUE and Y. IIGUNI ... 191

Nonlinear state predictor for a class of nonlinear time-delay systems
D. WANG, D. H. ZHOU and Y. H. JIN ... 197

NUMBER 4—10 APRIL 2004

Identification of nonlinear discrete-time systems using raised-cosine radial basis function networks
A. F. AL-AJLOUNI, R. J. SCHILLING and S. L. HARRIS ... 211

H_∞ almost disturbance decoupling for a class of linear systems: a constructive approach
S. ZHOU and G. FENG ... 223

Robust non-fragile guaranteed cost control of uncertain large-scale systems with time-delays in subsystem interconnections
J. H. PARK ... 233

A study on hybrid random signal-based learning and its applications
C.-W. HAN and J.-I. PARK ... 243

Lifted digital redesign of observer-based tracker for a sampled-data system
H.-P. WANG, J. S.-H. TSAI, Y.-I. YI and L.-S. SHIEH ... 255

NUMBER 5—20 APRIL 2004

Time-series prediction using adaptive neuro-fuzzy networks
C.-J. LIN ... 273

Lyapunov function proof of Poincaré's theorem
W. M. HADDAD, S. G. NERSESOV and V.-S. CHELLABOINA ... 287

Deteriorating item inventory model with shortage due to supplier in an integrated supply chain
H. RAU, M.-Y. WU and H.-M. WEE ... 293

$\mathcal{H}_2$ guaranteed cost computation by means of parameter dependent Lyapunov functions
P. J. DE OLIVEIRA, R. C. L. F. OLIVEIRA, V. J. S. LEITE, V. F. MONTAGNER and P. L. D. PERES 305

Adaptive stabilization of input-saturated plants with known unstable poles
F. GIRI, F. Z. CHAOUI and A. CHATER ... 317

NUMBER 6—MAY 2004

A feedback policy for a modified Samuelson–Hicks model
ST. KOTSIOS and J. LEVENTIDIS ... 331

Optimal number of hosts in a distributed system based on cost criteria
M. XIE, Y. S. DAI, K. L. POH and C. D. LAI ... 343

Neural-network-based identification and control of a thin plate using piezoelectric actuators and sensors
V.-T. LIU, C.-L. LIN and G.-P. LEE ... 355

Robustness of full-order and restricted-structure optimal control systems
M. J. GRIMBLE ... 375

NUMBER 7—JUNE 2004

Robust decentralized adaptive stabilization for a class of interconnected systems with unmodelled dynamics
Z.-J. WU, X.-J. XIE and S.-Y. ZHANG ... 389

Introduction to information systems theory: concepts, formalism and applications
V. S. LERNER ... 405

Global optimization technique for fixed-order control design
D. FAMULARO, P. PUGLIESE and Y. D. SERGEYEV ... 425

Optimal input design for the detection of changes towards unknown hypotheses
F. KERESTECİOĞLU and İ. ÇETIN ... 435

NUMBER 8—10 JULY 2004

Sliding-mode control design for a class of systems with non-matching nonlinearities and disturbances
B. M. DIONG ... 445

Buyer–seller fuzzy inventory model for a deteriorating item with discount
K. DAS, T. K. ROY and M. MAITI ... 457

Feedback passivity approach to output feedback disturbance attenuation for uncertain nonlinear systems
Y. I. Son, J. W. Yang, N. H. Jo, H. Shim and J. H. Seo ... 467
Stable multi-estimation model for single-input single-output discrete adaptive control systems
A. Ibeas, M. De la Sen and S. Alonso-Quesada ... 479

NUMBER 9—20 JULY 2004

Model reduction of bilinear systems described by input–output difference equation
S. A. Al-Baiyat ... 503
Identification and reconstruction of chaotic systems using multiresolution wavelet decompositions
H. L. Wei and S. A. Billings... 511
Stability and bifurcation of disease spreading in complex networks
Xiang Li, Guanrong Chen and Chunguang Li... 527
Multiobjective nonlinear system identification: a case study with thyristor controlled series capacitor (TCSC)
E. G. Nepomuceno, R. H. C. Takahashi, L. A. Aguirre, O. M. Neto and E. M. A. M. Mendes 537
Reduced-order controller design with low sensitivity to small feedback delays
H. Oloomi and B. Shafai ... 547
Corrigendum 557

NUMBER 10—AUGUST 2004

Low Earth-orbit satellite attitude stabilization with fractional regulators
A. Kailil, N. Mrani, M. Mliha Touati, S. Choukri and N. Elalami ... 559
Efficient recursive adaptive pole placement algorithm
J. Li and D. W. C. Ho ... 569
An adaptive memory programming method for risk logistics operations
C. D. Tarantilis and C. T. Kiranoudis... 579
Modelling adaptive multi-agent manufacturing control with discrete event system formalism
G. Maione and D. Naso ... 591

NUMBER 11—SEPTEMBER 2004

Adaptive tracking control for robot manipulator
R.-J. Wai, C.-Y. Tu and K.-Y. Hsieh... 615
Dynamic programming and lower-bound approaches to the minimum binding problem
S. Kataoka and M. Kajiya ... 629
On the stability of DC-to-DC converters in photovoltaic systems undergoing sliding motions
F. D. Bianchi, H. De Battista and R. J. Mantz ... 637
Robust commit time decisions and bounds for measuring demand-side quality costs
J. Yue and M.-C. Wang ... 649
A study on the stabilization of the van der Pol limit cycle
D. W. Repperger, K. Buckholtz and M. Daniels... 661

NUMBER 12—10 OCTOBER 2004

Observer-based fuzzy control of fuzzy time-delay systems with parametric uncertainties
R.-J. Wang ... 671
Asymptotic stability of a parallel repairable system with warm standby
X. Houbao and G. Weihua ... 685
On the line planning problems of the hub public-transportation networks
A. Abbas-Turki, R. Bouyekhf, O. Grunder and A. El Moudni ... 693
Reliable observer-based H_∞ control of uncertain state-delayed systems
B. Chen and J. Lam ... 707
Observer-based control of multi-agent systems under decentralized information structure
Q. P. Ha and H. Trinh ... 719

NUMBER 13–14—20 OCTOBER–15 NOVEMBER 2004

Special issue on evolutionary computation for systems and control applications
K. P. WONG and Z. Y. DONG ... 729

Application of differential evolution in harmonic worst-case identification of mass rapid transit power supply system
C. S. CHANG, L. R. LU and F. WANG ... 731

A Java-based parallel platform for the implementation of evolutionary computation for engineering applications
C. C. FUNG, J. B. LI, K. W. WONG and K. P. WONG ... 741

Genetic algorithms with applications in wireless communications
Y. HONG and Z. DONG ... 751

System for foreign exchange trading using genetic algorithms and reinforcement learning
A. HRYSHKO and T. DOWNS ... 763

Minimax control design for nonlinear systems based on genetic programming: Jung's collective unconscious approach
J. IMAE, N. OHTSUKI, Y. KIKUCHI and T. KOBAYASHI ... 775

Searching oligo sets of human chromosome 12 using evolutionary strategies
Y.-Y. JOE, A. TAY, Z.-Y. DONG, H.-H. NG and H. XU ... 787

Genetic design of discrete dynamical basis networks that approximate data sequences and functions
K. L. JONES, T. N. WILD and D. L. OLMSTED ... 801

Lateral acceleration control design of a non-linear missile: a soft computing approach
T. SREENUCH, A. TSOURDOS, E. J. HUGHES and B. A. WHITE ... 815

Dynamic coast control of train movement with genetic algorithm
K. K. WONG and T. K. HO ... 835

Genetic algorithm-based spinning reserve dispatching in a competitive electricity market
Z. XU, Z. Y. DONG and K. P. WONG ... 847

NUMBER 15—DECEMBER 2004

Blind parametric identification of non-Gaussian FIR systems using higher order cumulants
S. SAFI and A. ZEROUAL ... 855

Stabilizing feedbacks for imperfectly known, singularly perturbed nonlinear systems with discrete and distributed delays
Y. Y. LIN-CHEN and D. P. GOODALL ... 869

Some studies on uncertainty management in dynamical systems using cybernetic approaches and fuzzy techniques with applications
KAUSIK KUMAR MAJUMDAR and D. DUTTA MAJUMDER ... 889

On linear quadratic optimal control of linear time-varying singular systems
CHI-JO WANG ... 903
